#RAREDISEASEDAY

RARE DISEASE DAY 2023
INFORMATION PACK
What is Rare Disease Day?

Rare Disease Day is the official international awareness-raising campaign for rare diseases which takes place on the last day of February each year. The main objective of the campaign is to raise awareness amongst the general public and decision-makers about rare diseases and their impact on patients’ lives.

Rare Disease Day was launched by EURORDIS-Rare Diseases Europe and its Council of National Alliances in 2008.

How to show your support for Rare Disease Day

Raising awareness of what it means to be rare

There are over 300 million people worldwide living with a rare disease. Together across borders, and across the 6000+ rare diseases we work towards more equitable access to diagnosis, treatment, care and social opportunity.

Our key message for Rare Disease Day 2023 is SHARE YOUR COLOURS!

Find some inspiration below for ideas to take part in this year’s campaign

1. Share a photo to show solidarity with people living with a rare disease in your community! Share a photo with painted hands on social media using #RareDiseaseDay and tag @rarediseaseday.

2. Download the Rare Disease Day logo and make it visible online. Hero the logo on flyers, t-shirts and even cake—the possibilities are endless!

3. Use key rare disease statistics† to share the message that rare is many to the media:

   - 300 million people living with a rare disease worldwide
   - Over 6000 different rare diseases
   - 72% of rare diseases are genetic
   - 70% of those genetic rare diseases start in childhood

4. Advocate to policy-makers that people living with a rare disease need equitable access to diagnosis, treatment, and care. For more information on advocating for rare diseases as part of Universal Health Coverage see a position paper from Rare Diseases International.

5. Share the new campaign materials already available in the downloads section.

6. Add the official Facebook frame to your social media profiles!

† Research recently published in the European Journal of Human Genetics, article authored by EURORDIS-Rare Diseases Europe, Orphanet & Orphanet Ireland “Estimating cumulative point prevalence of rare diseases: analysis of the Orphanet database”. The analysis is of rare genetic diseases and is therefore conservative as it does not include rare cancers, nor rare diseases caused by rare bacterial or viral infectious diseases or poisonings https://www.nature.com/articles/s41431-019-0508-0
1. JOIN US ON SOCIAL MEDIA

Get involved on social media

Share videos and photos from your Rare Disease Day events on social media using #RareDiseaseDay and tag @rarediseaseaday.

Follow us!

Stay up to date with the latest news from this year’s Rare Disease Day campaign by following us on Facebook, Twitter and Instagram.

Add the official Facebook frame and Twibbon to your profile photos!

Use the official hashtag

#RareDiseaseDay is the unique campaign hashtag for Rare Disease Day, be sure to use it in your social media posts in help build momentum around the global campaign!

2. ORGANISE AN EVENT

Every year, thousands of events are organised in over 100 countries to mark the occasion of Rare Disease Day.

Due to the current COVID-19 situation, most of the events will be held online, which will give the opportunity to people to join events all around the world.

Organise an online event during or around the month of February for Rare Disease Day to raise awareness of rare diseases in your community.

Here are some successful ideas from organisers around the world:

• Host a webinar
• Illuminate a building for Rare Disease Day: check out our toolkit and watch our webinar to learn top tips
• Raise awareness for people living with a rare disease on Facebook and Instagram Live and invite your friends to join
• Hold an art, photography or essay-writing competition
• Organise a socially distanced walk
• Plan a sporting event
• Present a manifesto to your local authorities.

Post your event

Once you have planned your event, share it on the Rare Disease Day website so it can be added to the map showing events taking place worldwide for Rare Disease Day.

Don’t forget to upload photos and videos of your event afterwards!

Communicate about your event

Have you organised an event, but you don’t know how to promote it? Use the official Rare Disease Day downloadable materials. If you are a graphic design lover you can create your own materials using some of the elements of the campaign (Rare Disease Day colours, brush strokes, hero portraits and more...).
3. BECOME A FRIEND

Do you want to share your organisation or company’s support for the campaign?

Become a Rare Disease Day friend! You only need to fill in your details to create your profile page featured on the Rare Disease Day website. Then everyone will be able to see your compromise towards people living with a rare disease.

Don’t forget to include details about your Rare Disease Day activities!

4. TELL YOUR STORY

Raise awareness about rare diseases and their impact on peoples’ lives by sharing your story of living with a rare disease or caring for someone that does.

You can submit a written or video testimony on the Rare Disease Day website and read the stories already uploaded!

5. TAKE ACTION LOCALLY

As well as holding events you can take action in your country, region or local area to raise awareness of rare diseases!

On Rare Disease Day, we call for equity for people living with a rare disease around the world.

Contact the press

Reach out to local or regional newspapers and radio stations to get coverage of your event for Rare Disease Day.

Send out a press release to media in your area, highlighting the issues most important to rare disease patients in your country.

Watch our webinar ‘How to use Rare Disease Day to advance your advocacy objectives’ to learn the basics!
SHARE YOUR COLOURS
RARE DISEASE DAY | 28 FEBRUARY 2023

Rare Disease Day is organised globally by EURORDIS Rare Diseases Europe, Rare Diseases International and 68 national alliances of patient organisations for rare diseases

#RAREDISEASEDAY RAREDISEASEDAY.ORG EURORDIS.EU
Get political

Write a letter to key decision makers about the important issues facing rare disease patients in your country and urge them to make rare diseases a priority!

Advocate to policy makers that people living with a rare disease need equitable access to diagnosis, treatment, care and social opportunity. For more information on advocating for rare diseases as part of Universal Health Coverage see the RDD Equity toolkit.

Invite politicians to visit your organisation, attend an event you are hosting or to visit a rare disease research laboratory. Encourage your MEP to join the network Parliamentary Advocates for Rare Diseases.

FAMOUS FACES

Approach celebrities in your country to join the rare disease cause and show support for Rare Disease Day by sharing a #RareDiseaseDay post on social media.

6.SHARE YOUR PHOTOS

If you and your friends, family and colleagues participated in Rare Disease Day, don’t forget to share your photos from your activities around the world with us by uploading them to the Rare Disease Day website!

7.DOWNLOAD COMMUNICATION MATERIALS

The official Rare Disease Day communication materials and logo are free to use when promoting your Rare Disease Day events.

This year we want you to share your colours! That’s why we have created a selection of materials. Edit them, add your logo, share them... don’t miss the chance of participating in the most international Rare Disease Day.

Some of the materials have been translated into the following languages: Mandarin, English, Arabic, Spanish, Portuguese, French, Hindi and Russian.

Also available to download:
• The official Rare Disease Day logo
• Website countdown
• Rare Disease Day style guide
• Fonts
• Webinar toolkits.
HISTORY OF RARE DISEASE DAY

Created by EURORDIS and its Council of National Alliances, the very first Rare Disease Day took place in 2008 with events in 18 participating countries.

EURORDIS continues to coordinate the international campaign together with a worldwide patient community. Patient organisations from North America joined in 2009 and then all continents by 2010. National Alliances ensure the coordination of Rare Disease Day at a national level, working with patient organisations locally and often organising a national event aimed at policy makers.

The number of participating countries has increased year on year, with thousands of events taking place on all continents for on or around the month of February. In total, events have taken place in over 100 countries since 2008.

Disclaimer: Rare Disease Day must not serve to promote any specific commercial interest and no visibility should be given to any products.

For information on using the Rare Disease Day logo please read the conditions of use and the style guide.
